Profile

Brad serves IBJI's Bourbonnais - Mooney Drive clinic as Physical Therapist and Facility Manager. Brad joined the IBJI team in 2020, bringing a decade of experience in outpatient physical therapy.

Brad became interested in physical therapy as a high school student. He completed a Bachelor of Arts in Biology at Knox College in 2006 before earning his Doctor of Physical Therapy degree from Governor's State University in 2010.

Brad enjoys the variety of cases he treats in the outpatient setting. His goal with each patient is to improve quality of life by reducing pain, regaining functioning, and rehabilitating injuries. From athletes rehabbing sports-related injuries to employees rebuilding function in an effort to return-to-work, he strives to connect with all patients and help them reach their functional goals through patient education and direct therapy.

Brad has pursued ongoing professional development, earning certifications in Functional Capacity Evaluations, IASTM with RockBlade, and post-concussion vestibular rehabilitation. He is also a trained Workers' Compensation provider. In addition, he has developed close working relationships with local orthopedic surgeons to improve patient outcomes both pre- and post-joint replacement.

Brad places significant importance on the patient-clinician relationship and takes pride in his high quality-of-care.

Education

- Bachelor of Arts in Biology, Knox College 2006
- Doctor of Physical Therapy, Governor's State University 2010
